How to Use the Tally Cloud.

➢ Users can access from Web Browser / Remote app
➢ Every User have separate user id. All locations data is stored in cloud.
➢ Individual locations are view only their location data only.
➢ Tally Data User id and password will be remaining same.
➢ Cloud Admin will have taken to backup facility.

Implementation of Cloud

➢ Reactivate your Multiuser license in cloud and data will be move to Virtual Machine.
➢ All locations data move to cloud.
➢ Initial Training will be provided by us.
➢ Cloud Admin user's rights training to provide by us.

Benefits of TallyPrime on Cloud

➢ While travelling or when you are meeting your clients, you can use this secure solution to access Tally Prime from anywhere.
➢ You will have the flexibility of working on the same data collaboratively with other users.
➢ You can seamlessly upload your existing data to a virtual cloud environment and continue to use the same.
➢ Highly cost-effective solution to access Tally Prime remotely with complete flexibility to choose the plans that work best for your business.

In Tally and AWS, you have the technology leaders in their respective spaces (business software and cloud platforms). Therefore, it is highly reliable.

Data Security and Privacy

Data security feature: Data security is multi-layered. Servers are hosted in Tier IV Data Centres to ensure that there is no leak in data on the physical front. We install the latest antivirus, antimalware and firewalls to ensure there is no leak on the network front. We also have a daily backup which takes a snapshot of the entire server, including tally data and saves it on another server through Intranet thus making it inaccessible to any public network.

Security Features:

✓ 100% Secure Data - End-to-end encryption protects your confidential accounting data.
Automatic backup, sync and restore - easy to recover deleted files and
previous versions of any file, any time. Never lose a file again.

✓ Enterprise-grade infrastructure - Data is replicated across multiple SSD,
Tier IV certified data-centre locations with SAS RAID storage, automatic failover and a 99.995% or better uptime SLA.

✓ Account security controls - Two-factor authentication

✓ Next-Generation Firewalls (NGFW) - Sophos - Beat sophisticated cyber-
attacks with superior security.

✓ Brute Force Attack defender – After 10 wrong login attempts, the IP address is
blocked from firewall level, so there are no chances of external attacks or treats.

✓ HTTPS secured login with valid SSL certificate. Tier-4 Data centre follows all compliances of ISO 270001, HIPPA,
PCI-DSS. We're committed to protecting your Tally Data security and privacy in the cloud!
